CONTENTS

Tests and optimal guarded weights of evidence
E. Kulinskaya and R.G. Staudte 1

A simple robust estimation method for the thickness of heavy tails
M.M. Meerschaert and H.-P. Scheffler 19

Regression model fitting with long memory errors *H.L. Koul and W. Stute* 35

A nonparametric goodness-of-fit test for a class of parametric autoregressive models *J.N. Wandji* 57

Estimation and testing of regression disturbances based on modified likelihood functions *M.R. Laskar and M.L. King* 75

On the asymptotic normality of the L_2- error in partitioning regression estimation *J. Beirlant and L. Györfi* 93

Necessary and sufficient conditions for superiority of misspecified restricted least squares regression estimator *J. Groß, G. Trenkler and E.P. Liski* 109

Analysis of the posterior for spline estimators in logistic regression
N. Raghavan and D.D. Cox 117

On the overall sensitivity of the posterior distribution to its inputs
B. Clarke and P. Gustafson 137

Stability and infinitesimal robustness of posterior distributions and posterior quantities *S. Basu, S.R. Jammalamadaka and W. Liu* 151

Bayesian marginal influence assessment *R. E. Weiss and M. Cho* 163

Comparing treatments under growth curve models: Exact tests using generalized *p*-values *E.M. Chi and S. Weerahandi* 179

LQ-moments: Analogs of L-moments *G.S. Mudholkar and A.D. Hutson* 191

A mathematical model for assessing the temporal association between health disorders and medical treatments *S.H. Jacobson and D.J. Morrice* 209

Statistical inference for a multitype epidemic model
P.S.F. Yip and Q. Chen 229

A tail bootstrap procedure for estimating the tail Pareto-index
J.N. Bacro and M. Brito 245

A note on Bartlett-type correction for the first few moments of test statistics
G.M. Cordeiro and S.L.P. Ferrari 261

The efficiency of an alternative to ratio estimator under a super population model *R. Singh, H.P. Singh and M.R. Espejo* 287

Mixture models based on homogeneous polynomials
N.R. Draper and F. Pukelsheim 303

Optimality of designs with generalized group divisible structure
S.K. Srivastav and J.P. Morgan 313

Construction of response surface designs for qualitative and quantitative factors *C.F.J. Wu and Y. Ding* 331

Design measures and approximate information matrices for experiments without replications *E.G. Müller and A. Pázman* 349

A comparison of recapture, removal and resighting designs for population size estimation *C.J. Lloyd, P.S.F. Yip and K.S. Chan* 363
